Rai Lite™ IND T5HO or T8 Indirect Fixture

The Rai Lite IND perforated powder-coated aluminum lens and mounting kit creates a uniquely attractive indirect lighting system using fluorescent side-mount strip fixtures*.

Each IND kit comes standard with a 4' or 8' textured white perforated aluminum lens with seamlessly inserted standoffs for mounting. Accessories are available for continuous row mounting and for pendant or cable suspension.

The IND creates an attractive, low-glare working and learning environment, and is an excellent choice for offices or schools. Screen reflections and shadowing effects are reduced, making the IND ideal for lighting computer labs and work centres. A white ceiling is recommended for optimal lighting.

RAI-IND (4')

All fixtures CSA approved.

* NOTE: Special non-standard strip required for T5HO.
